-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because line 2 of the abstract at the beginning of the sentence "a circular" should be "A circular" and line 7 the word "gattach" should be "attaché". Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Pottratz (US 3,808,416).

Regarding claims 1-3 and 7, Pottratz ('416) discloses a handbag with interior light having a carrier 2, a closeable top opening 8, a closed bottom 22, a circuit of string of lights 10, column 2, lines 55-67, a power source 16 and a switch 18 and column 3, lines 1-7 teaches that the sting of lights can be wires or connectors.

Regarding claim 5, Pottratz shows in figure 4 the carrier is a conventional bag.

Regarding claim 6, Pottratz teaches on column 4, lines 48-53 that the carrier can be an attaché case.

### ***Claim Rejections - 35 USC § 103***

Art Unit: 2875

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pottratz as applied to claim 1 above, and further in view of Lumley (US 6,499,857).

Regarding claim 4 Pottratz discloses all the limitations of the claimed invention as cited above, but does not disclose a light system placed at the opening of the carrier to shine downwardly.

Regarding claims 4, Lumley ('857) discloses a light carrier 21 having a light system 23 placed inside the carrier (figure 3) to illuminate the light downwardly.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the illuminated carrier of Pottratz with the downward illumination of a carrier that is taught by Lumley in order to provide a means of illuminating a surface of a carrier, as taught by Lumley (column 1, lines 23-28).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stone et al (US 6,585,390) and Coyner et al (US 5,073,844) both are illuminated carrier illuminating the inside portion of the carrier..
